EXAMINER'S ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 8-10 are rejected under 35 U.S.C. § 102(b) as being anticipated by Caldwell. See lines 27-35 of page 2 and 103-108 of page 3.

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claims 4-7 and 11 are rejected under 35 U.S.C. § 103 as being unpatentable over Caldwell. Caldwell does not show top and bottom

covers on his grid, but it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide same in order to protect the delicate partitions from damage. It would further have been obvious to vaccuate the Caldwell cells in order to minimize x-ray absorption.
